Nome. A large dish-shaped communications antenna is on the beach at Nome. An aero radiobeacon is 2.5 miles E of Nome (shown on charts 16200 and 16206), and an aerolight is at the Nome Airport.

The general anchorage for deep-draft vessels is in 7 to 8 fathoms about 1 mile from the beach abreast of Nome. Vessels of less draft anchor in about 6 fathoms a little closer to the beach. In strong S winds vessels should anchor farther offshore.

The entrance to Nome Harbor has a 2,982-foot (909 m) causeway, marked by seasonal lights, and a 3,025-foot (922 m) breakwater. The City Dock (south) and Westgold Dock (north) are on the causeway with 22.5 feet (6.8 m) alongside. The City Dock, 200 feet (61 m) in length, handles bulk cargo and fuel deliveries. The Westgold Dock, 190 feet (58 m) in length, exports gravel and handles the loading and unloading of heavy equipment.

Buoys mark the channel from the outer harbor entrance to the inner harbor. A barge ramp is in the inner harbor on the W side of the Snake River. The Small Boat Harbor, South Dock, East Dock and Fish Dock are on the E side of the harbor. The Small Boat Harbor has a 120-foot (36 m) floating dock with moorage for vessels with up to an 8-foot (2.4 m) draft.

The International Maritime Organization has designated NAVTEX as the primary means for transmitting coastal urgent marine safety information to ships worldwide. NAVTEX transmissions have a designed range of 400 NM and coverage is reasonably continuous in the east, west and Gulf coasts of the United States, as well as the area around Kodiak, Alaska, Guam and Puerto Rico. All NAVTEX broadcasts are made on 518 kHz. NAVTEX broadcast sta-

tions and message content for the West Coast are as follows:
